## New Clutch Cables

AMS Automotive is pleased to offer a comprehensive line of new clutch cables. This program is designed to provide yet another component in our “SELL THE SYSTEM” philosophy of servicing the entire clutch system.

Worn or stretched clutch cables can often lead to “no-release” or hard clutch pedal complaints. The AMS new clutch cable program eliminates this variable from the equation and improves the ability to perform a complete professional clutch installation the first time, every time.

Each AMS new clutch cable is carefully matched to the specific application and includes the following features:

- OE style end-fittings
- Exact OE inner and outer cable length and layout, including cable brackets where required
- Comprehensive installation information on more difficult to install applications
- OEM fit, form, and function
- Backed by a 90-day warranty against defects in materials and workmanship

The AMS new clutch cable program consists of nearly 70 part numbers, representing over 95% of aftermarket passenger car and light duty truck clutch cable sales.

Along with new clutch cables, our comprehensive clutch system offering now includes new clutch kits, new clutch hydraulics, new flywheels, new clutch forks, and new clutch fork ball studs...all the parts required for a professional clutch replacement.

**For more details, please contact our technical service department at 800.528.6743.**
