## Clutch Fork Ball Studs

AMS Automotive is pleased to offer the following new ball studs to compliment our existing new clutch program.

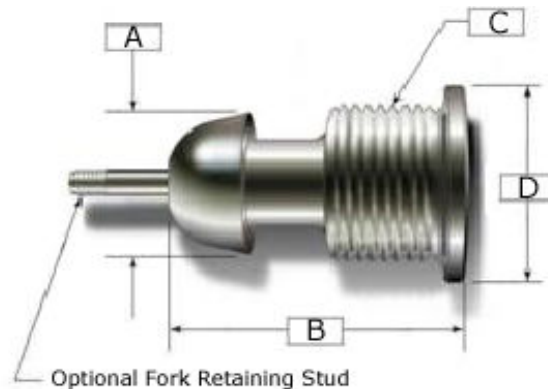

Due to significant overlaps in model coverage, we recommend using the attached dimensional guide to correctly identify the ball stud. Interchange information has also been included.

Each new AMS ball stud is engineered to OEM specifications, and includes the following features:

- Superior heat treatment and finish
- Exact OEM fit, form and function
- Backed by a 90-day warranty against defects in materials and workmanship

A worn ball stud can create clutch release problems because the geometry of the clutch linkage is altered. A new ball stud restores the original geometry and assures smooth, even release.

These new ball studs compliment our "Sell The System" philosophy by providing a wide-ranging program of new clutch kits, clutch hydraulics, flywheels, clutch cables and forks...all the parts required for a professional clutch replacement.

### Dimensional Guide

AMS Number	Ball Dia. -A-	Dim. -B-	Thread Size -C-	Outside Dia. -D-	Fork Retaining Stud	Applications	Jobber Price Each
<b>BS0401</b>	0.73"	1.46"	13/16" x 16	1.00"	No	1960-89 GM rear wheel drive passenger cars	\$5.98
<b>BS0402</b>	0.67"	1.70"	13/16" x 16	1.00"	Yes	1988-95 Chevrolet, GMC C/K Trucks (Greaseable Design)	\$6.98

### OEM and Competitive Interchange

AMS Number	OEM Number	Auto Craft Number	Connection Number	LuK Number	Venture Number
<b>BS0401</b>	3729000	BS 9000	4030506	LAC108	V96001
<b>BS0402</b>	15552866	BS 9050	4030508	LAC153	V96006
