Heavy-Duty Vehicle Clutch Installation Kits

"Sell The System"

In order to minimize unnecessary costs and to ensure longer life and smoother shifting, it's important to replace all related wear components when installing a new clutch and flywheel. That's why AMS Automotive recommends a clutch installation kit with every clutch job. After all, the cost to remove/reinstall the transmission after the clutch/flywheel has already been installed, is far greater than the cost of an installation kit.

AMS installation kits fit popular Eaton® Fuller® RT series and FR series transmissions. The components in each kit are produced using the highest quality materials and craftsmanship, including:

- A pilot bearing that utilizes high temperature grease and Viton™ seals, engineered to resist damage from today's hotter running engines.
- Four "short" and/or three "long" cross shaft bushings that allow for replacement of any combination of bushings currently used in the application. Each "long" bushing includes the lube retention feature preferred by professional technicians.
- A torque limiting clutch brake that prevents tang breakage from driver misuse.
- The latest style front bearing cover, which includes a smooth clutch brake surface and oil return grooves for superior lube retention.
- A heat-treated and precisely-machined transmission input shaft and clutch fork.
- A silicon-beaded clutch housing and shift tower gasket, designed to eliminate leaks.

Description	Qty.	* IK2468	* IK3599	* IK3600	* IK3601
Pilot bearing with Viton™ seal	1	X		X	
Pilot bearing with Viton™ seal and snap ring	1		X		X
Clutch release fork	1	X	X	X	X
Clutch brake (2.00" torque limiting)	1	X	X	X	X
Input shaft (2.00" x 10T x 18 spline)	1	X	X		
Input shaft (2.00" x 10T x 26 spline)	1			X	X
Input shaft support bearing (ball style) with snap ring	1	X	X		
Input shaft support bearing (roller style) with snap ring	1			X	X
Input shaft snap ring (inner)	1	X	X	X	X
Input shaft snap ring (outer)	1	X	X	X	X
Front bearing cover	1	X	X	X	X
Cross shaft bushing (short)	4	X	X	X	X
Cross shaft bushing (long)	3	X			
Gasket kit	1	X	X	X	X
